Company Overview

SlyTech LLC is a Virginia-based small business specializing in cybersecurity, offensive security, and secure IT infrastructure solutions. We provide mission-focused services to federal, state, and commercial clients by identifying vulnerabilities, strengthening defenses, and improving operational resilience across complex environments. Our company delivers advanced cybersecurity capabilities including penetration testing, vulnerability management, defensive cyber operations, and secure systems integration. We combine real-world military discipline with advanced technical expertise to proactively defend critical systems and sensitive data from evolving cyber threats. We are committed to delivering tailored, high-impact security solutions that help organizations strengthen and maintain their cybersecurity posture nationwide.
