Company Overview

SlyTech LLC is a cybersecurity and IT services firm specializing in protecting federal civilian agencies, Department of Defense organizations, and commercial enterprises from evolving cyber threats. We deliver mission-focused cybersecurity solutions including penetration testing, vulnerability management, cloud security assessments, incident response, threat hunting, and security engineering. Our leadership combines advanced cybersecurity expertise with six years of Army National Guard service, bringing a culture of readiness, disciplined execution, risk awareness, and mission assurance to every engagement. We help organizations identify vulnerabilities, strengthen defenses, and maintain secure, resilient operations across complex environments. Through a proactive and intelligence-driven approach, we enable our clients to reduce risk, improve security posture, and protect critical systems and data.

Why Partner with SlyTech

Federal Civilian Cybersecurity Support
Supported a federal civilian agency environment under Gunnison Consulting Group's prime contract through Eliassen Group, performing penetration testing, vulnerability assessments, cloud security assessments, risk analysis, and remediation-focused reporting.

Department of Defense Cyber Defense Operations
Supports a DoD environment through Insight Global and Resource Management Concepts (RMC), providing SOC operations, incident response, threat hunting, security monitoring, and defensive cyber operations support.

Commercial Cybersecurity Experience
Leadership experience includes penetration testing, web application security assessments, vulnerability management, network security testing, and cybersecurity consulting for commercial organizations.

Core Competencies

- **Penetration Testing & Adversary Simulation**
- **Vulnerability Assessments & Management**
- **Cloud Security Assessments**
- **Incident Response & Cyber Recovery**
- **Threat Hunting & Threat Intelligence**
- **Security Operations Center (SOC) Support**
- **Security Engineering & Architecture**
- **Risk Management Framework (RMF) Support**
- **Defensive Cyber Operations (DCO)**
- **Network & Infrastructure Security**
- **Security Monitoring & Detection Engineering**
- **Cybersecurity Compliance & Risk Assessments**
- **Secure Systems Integration**
- **Federal Civilian Agency Support**
- **Department of Defense (DoD) Cybersecurity Support**

Differentiators

- Veteran-led and mission-driven approach
- Expertise in offensive security and adversary simulation
- Advanced detection engineering capabilities
- Tailored cybersecurity strategies for government and enterprise clients
- Focused on proactive threat identification and defense strengthening
